

# ART FLEX DIA

Size: 80 mm (3"), 100 mm (4")

Grit: #60, #100, #200, #400, #800, #1500, #3000, TSUYA, BUFF (WHITE), BUFF (BLACK)

It is one of the oldest dias being used to polish the marble stones for a long time in Japan.

It uses unique resin-bond diamond recipe that achieve both durability and sharpness.

There are two kinds for the final process, Buff, and Tsuya which uses with water.

# MARBLE FLEX DIA

This dia is for marble and artificial marble.

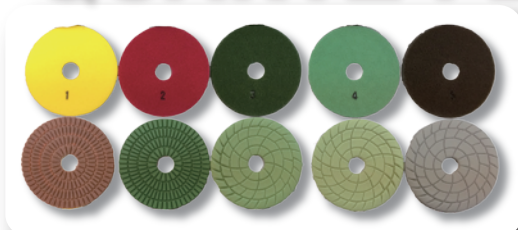

It has long life and good sharpness, and can drastically improve productivity.

Depending on the luminosity you want, you can skip some polishing steps.

Size: 80 mm (3"), 100 mm (4")

Grit: #100, #200, #400, #800, #1500, #3000, #6000

# QUARTZ FLEX DIA

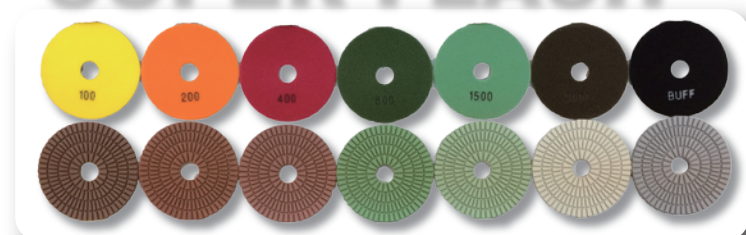

Size: 100 mm (4")

Type: #1, #2, #3, #4, #5

This is designed especially for artificial marble, and best for the artificial marble containing natural stones. Before polishing, soak them in water completely. Then you can obtain more beautiful shine.

# SUPER FLASH

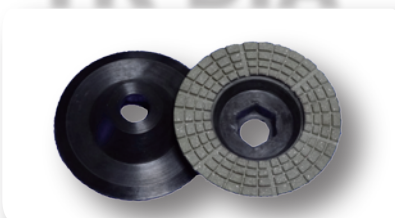

Size: 100 mm (4")

Grit: #100, #200, #400, #800, #1500, #3000, Buff

This is the only Made in Japan flexible dia that can be used for dry. If water can't be used in the work sites, this is the best dia. Not only dry polish, but it can be used for wet as well. For the artificial marble, the wet polishing is recommended.

# TK DIA

Size: 100mm(4")

Grit: #50, #100 (DRY)

Grit: #100, #200, #400 (WET)

This is the best product with good sharpness and enables the surface smooth. It can be used for wet and dry grinding, and is available for granite, marble and artificial marble.
